Forecast for Wednesday 19 Jun 2024

Weather: Generally partly cloudy skies through the early hours of Wednesday although cloud may thicken at times, to give periods of more overcast skies. A few shallow pockets of mist are possible in sheltered valleys. Through the morning, skies will remain partly cloudy allowing some warm spells of sunshine to develop. It may be breezy for a time through the morning, but winds will steadily ease with spells of sunshine becoming longer lasting into the latter part of the afternoon and evening. Feeling warm in light winds and strong sunshine.

Chance of cloud-free hill tops above 600m: 60% at first due to areas of lower stratus, but rising to 100% by mid-morning.

Low cloud and visibility: Bases sometimes down at 500m through the early hours and first part of the morning, gradually rising above tops by mid-morning. Visibility generally excellent, but poor to moderate in any early morning mist/low cloud.

Meteorologist's View

Sunscreen and a hat is essential as UV levels are very high, even with cloudier skies as we approach the longest day. This combined with higher temperatures than we've seen through much of June means plenty of water is also essential. Dry weather will mean that some paths may have loose material on them, which can increase the risk of trips and falls.

Recent rainfall: measured at Neuadd: altitude 353m

14:00 on Tue 18 Jun 2024	0mm	0mm	8.2mm

Forecast for Thursday 20 Jun 2024

Weather: Another fine day with sunny spells and light winds. Feeling warm in the strong June sunshine.

Maximum wind: Generally light and variable, no more than 10-15mph.

Chance of cloud-free hill tops above 600m: Perhaps 80% at first, generally rising to 100% for much of the period.

Low cloud and visibility: Generally very good or excellent.

Temperature: **Valleys:** PS08, rising to PS20
At 600m: PS13
Freezing level: Above tops (10,000 ft)
